# Getting Started

You drop into a huge side-scrolling world of hills, canyons, frozen peaks and wasteland. Enemies hunt you, and every one you take down drops cash. Spend it at the glowing **SHOP** signs on a massive arsenal, armor, medical supplies, barricades and training. The game pauses completely while you shop.

## Making money

• Everything is expensive on purpose: cheap pistols cost a few hundred dollars, good rifles tens of thousands, miniguns hundreds of thousands and futuristic weapons millions. **Laser swords start at $10,000,000** — they take serious grinding.

• Medical supplies are cheap and drop often: about half of all kills leave something to heal with, and gauze, bandages, energy bars and splints lie around the map. Carry a **Defibrillator** (up to 3) and it revives you automatically when you go down.

• Every kill drops cash. **Headshots** pay 25% more, a **combo** (kills within 3.5 s of each other) adds +10% per link, and bounties climb steeply with the **threat level**: about double at threat 5 and five times at threat 10.

• Free loot is scattered everywhere, but it is mostly small change. Gold bars and briefcases are rare jackpots.

• **Supply drops** parachute in every couple of minutes with cash and a medical item.

• Build income buildings in your base: **Money Printer** ($120 every 10 s), **Gold Printer** ($1,500) and **Crypto Mining Rig** ($20,000). Raiders go after them first, so wall them in.

• Dying costs 10% of your cash (at most $50,000). You keep your weapons, upgrades, perks and base, and enemies ease off for a while.

## Threat level & raids

Threat rises with time survived, kills and distance explored. At low threat you mostly meet Dimwits; as it climbs, Goons, Thugs, Mercenaries, Rocketeers and Marksmen arrive, then machine-gun Big Henchmen and finally the minigun Boss Brute. About every three minutes a **RAID** sends a large wave straight at you. A countdown appears 30 seconds before it hits.

# Base Building

Press **B** to enter build mode. Pick a structure with 1-0, Q or the mouse wheel, then left-click to place it. Items you bought in the shop are used first; otherwise the price comes out of your wallet. Right-click a structure to sell it back for half its value. Solid walls block enemies and their bullets, but your own shots pass straight through. You can stand on top of walls and watchtowers. Enemies will shoot and smash barricades that block their way, and they target turrets and Money Printers first.

**Stacking:** build a wall on top of the same kind of wall and the two merge into one taller, tougher wall. Sandbags, crates, wooden, steel, bunker and blast walls, concrete barriers and energy shields all stack (up to 420 pixels high). Turrets, med stations and printers can sit on top of a wall that is wide enough. Right-click a stack to take its top block off. If a wall is destroyed, whatever stood on it drops down.

| Structure | Type | HP | Price | What it does |
|---|---|---|---|---|
| Sandbag Wall | Wall | 450 | $600 | Cheap cover. Stand on it to shoot over. |
| Supply Crate Stack | Wall | 550 | $1,000 | Wooden crates. Good for climbing. |
| Wooden Barricade | Wall | 750 | $1,600 | Tall plank wall that blocks enemies. |
| Barbed Wire | Trap / utility | 400 | $1,200 | Hurts and slows enemies walking through. |
| Spike Strip | Trap / utility | 600 | $1,800 | Steel spikes. Ouch. |
| Landmine | Trap / utility | 50 | $2,400 | Explodes when an enemy steps on it. |
